Homestead Funds

Investment Objective & Strategy

The Value Fund seeks long-term growth of capital and income for the long-term investor. Current income is a secondary objective.

The fund generally invests in stocks of companies selling below what RE Advisers believes to be their fundamental value. To determine whether a stock is undervalued, RE Advisers considers, among other factors, potential earning power, financial debt ratios and any competitive advantages a company may have. Under ordinary conditions, the fund will invest at least 80% of its net assets in common stocks of companies with market capitalizations of \$2 billion or greater.

The Standard & Poor's 500 Value Index measures the performance of the large-capitalization value sector in the US equity market. It is a subset of the S&P 500 Index and consists of those stocks in the S&P 500 Index exhibiting the strongest value characteristics. Indices are unmanaged and investors cannot invest directly in an index. Unless otherwise noted, performance of indices do not account for any fees, commissions or other expenses that would be incurred. The index's returns include reinvested dividends.

Investing in mutual funds involves risk, including the possible loss of principal. Past performance does not guarantee future results.

Investors are advised to consider fund objectives, risks, charges and expenses before investing. The prospectus contains this and other information and should be read carefully before you invest. To obtain a prospectus, call 800.258.3030 or visit homesteadfunds.com

Equity securities generally have greater price volatility than fixed-income securities and are subject to issuer risk and market risk. Securities of small and medium-sized companies tend to be riskier than those of larger companies. Value stocks are subject to the risk that returns on stocks within the style category will trail returns of stocks representing other styles or the market overall.

Lipper ratings for Total Return reflect the Fund's historical total return performance relative to peers as of 12/31/18. Lipper ratings for Consistent Return reflect the Fund's historical risk-adjusted returns, adjusted for volatility, relative to peers as of 12/31/18. Lipper ratings for Expense reflect the Fund's expense minimization relative to peers with similar load structures as of 12/31/18. The Lipper ratings are subject to change every month and are based on an equal-weight average of percentile ranks for the Total Return, Consistent Return and Expense metrics over three-, five-, 10-year and overall periods. The highest 20% of funds in each peer group are named Lipper Leader or a score of 5, the next 20% receive a score of 4, the middle 20% are scored 3, the next 20% are scored 2 and the lowest 20% are scored 1. Homestead Value Fund, in Lipper's multi-cap value classification, received a rating of 5 for the three-, five-, 10-year and overall periods (number of funds rated in parentheses): Total Return: Three Year (423 funds), Five Year (363 funds), 10 Year (278 funds) and Overall (423 funds), Consistent Return: Three Year (423 funds), Five Year (363 funds), Ten Year (278) and Overall (423 funds), Expense: Three Year (129 funds), Five Year (122 funds), 10 Year (100 funds) and Overall (129 funds). Morningstar rated this Fund, in Morningstar's large-value category, 4 stars for the Overall period out of 1,099 funds, 4 stars for the 10-year period out of 686 funds, 4 stars for the five-year period out of 937 funds and 4 stars for the three-year period out of 1,099 funds for performance periods ending 12/31/18. The Morningstar Rating for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods.
