**2019 Estimated Mid-Year Distributions**

Homestead Funds will be paying income and/or capital gain spillback distributions at the end of June. A spillback distribution represents ordinary income and/or capital gain from the previous fiscal year that was not distributed by the end of that year. Spillback distributions are taxable in the year received, even though they represent income and/or capital gains earned by the funds in the previous year.

We are providing you with information regarding the expected distribution dates and estimated rates for your planning purposes. **The rates reflected below are estimates and are subject to change based on tax adjustments, market movements, fund cash flows, ongoing portfolio transactions and other factors occurring between now and the anticipated distribution date.** The exact amount to be paid will be determined on the distribution date.

The Daily Income, Short-Term Government Securities and Short-Term Bond Funds accrue ordinary income dividends daily and distribute them on the last business day of the month. For other funds paying distributions, the following dates will apply:
